

One Day Training Program on Emergency Preparedness & Response In Chemical Industries

OBJECTIVES

In the wake of the Bhopal disasters and other major accidents in the country. Safety in Emergency Preparedness & Prevention Response has become an area of National Priority action. The Factories Act 1948 was amended in 1987 and the Environment (Protection) Act 1986 was enacted and Rules were framed under these Acts. It is a legal requirement to prepare on – site / of – site emergency plans by industries carrying out hazardous chemicals. It is also required to prepare off – site emergency plans by District Emergency Authority. A number of major accident hazard installation and hazardous products handled in these installation have been identified in the country.

In order to strengthen emergency plans and to manage chemical accidents, chemical Accidents (Emergency Planning, Preparedness and Response) Rules 1996 have been framed for forming local. District, state and Central level Crisis Groups at Different levels have been/ are being set up. Though emergency plans have need periodic updating for emergency planning preparedness and response. The training will provide an ideal opportunity to all concerned to interact and discuss on Indian conditions and have Practical value especially for the on – site & off – site emergency planning, preparedness and prevention.

Participation certificates will be issued to the participants in person at the end of the program.

FOR WHOM

The program will be useful to managers and Executives from industries responsible for initiation new project and involved in production, operation, environmental protection facilities, safety officers and persons involved in handling hazardous products, officials from regulatory agencies, local authorities and institution.
