

One Day Training Program on

Safety in Warehousing, Materials Handling and Transportation

OBJECTIVES

Due to wide range of materials to be stored in factories, laboratories and warehouses good storage practice has become very important and the store personal should have a clear knowledge of the physical and chemical properties of the materials and the hazards they may cause if not handled properly so as to protect them from fires, explosions, emission of toxic gases, vapours, dusts and radiation and proper care in handling of toxic and corrosive materials when loading, transporting or unloading. More over material handling cost make up about 10 to 20 % of the total manufacturing cost in an average plant and about 25% of the compensable injuries in manufacturing industries are directly connected with handling of materials. It is therefore not surprising that safety in materials handling should receive utmost attention.

The programme has been designed to provide professional knowledge and skill in handling hazardous materials with emphasis on safety and security of persons, building and equipment.

Certificates will be issued to participant in persons at the end of the programme.

FOR WHOM

The Programme will be of interest and use to Executives at all levels in Safety dept., Stores, Purchase, Production, Transportation, Distribution, Logistics, Marketing, Export and Import Depts. of Manufacturing Industries, Transportation Undertakings and other related areas.

TOPICS

- Importance of safety in materials Handling / Storage / Transportation.
- Safety aspects in warehouse, Construction Layout, Stacking, Movement of material etc.
- Safety Features on Hazardous Chemicals, storage areas (tank Farm, Drum Storage, Godowns etc.)
- Fire Prevention/ Protection in warehousing, materials Handling & Transportation.
- Morden & Indian Standards in Materials Handling Devices and their Maintenance / Upkeep, Equipment, Transportation and Storage.
- Statutory Rules and Regulations including insurance guidelines.

PARTICIPATION

Open to All

FACULTY

Safety Experts from the fields and /or Govt. Institution
